

AUTOULTIMA PRO ROLL LAMINATOR EU/UK

Overview

If you have to constantly laminate multiple documents and time is precious then the stylish AutoUltima Pro Laminator is the perfect solution for you. No longer will you need to spend hours by the laminator loading pouches - the AutoUltima feeds, laminates and trims your documents at the touch of a button.

The simplicity of the AutoUltima is that you just insert your documents into the laminator as you would with a photocopier, press start and the laminator does the rest freeing up your valuable time to do other work.

With the fully automated AutoUltima Roll Laminator you can laminate over 100 documents in just 30 minutes compared with 19 using a pouch laminator and 56 with a standard roll laminator and trimmer. The process allows you to load up to 50 documents in any one go, walk away without waiting for it to warm up, and return to your documents perfectly laminated. The Ez Load technology prevents misloading of the roll film and the automatic built in cutter trims the documents leaving them ready to pick up in the handy collection tray.

Roll film is available in 42.5, 75 and 125 micron thickness and the laminator laminates document sizes up to A3 width. With fast throughput of 800mm per minute, heat up time of 1 minute for 75 microns and single touch control for temperature variations, the AutoUltima comes with a 1 year warranty for peace of mind.

The laminator shuts off after only 15 minutes which reduces unnecessary power use making it the ideal environmentally friendly choice. Weighing 38kg and sized at 787(H) x 483(W) x 686 (D)mm, the AutoUltima is a robust desktop unit that will maximise productivity in any office.
