

For Outstanding Display  
**LAMIBOARD**

With use of lamiboard, it is very convenient to laminate, preserve and display posters, photographs, paintings, certificates, registeries and others within 1 minute.

**APPLICATIONS**

- Photographs of Various Types
- Movie Poster
- Painting Display
- Art work Display
- Document Display
- Registeries
- Certificates

# LAMIBOARD for outstanding display

## DESCRIPTIONS

| TYPE                       | SIZE              | CODE NO. | PATTERN                                                                                                                                                                                                                                                                                                                                      | CONTENTS                                                                                                                                                |

Turn on the power switch of laminator and press 'MOUNT' key (When GMP Photonex laminator is used.)

## HOW TO USE LAMIBOARD

Attach easel on the back of finished LAMIBOARD.

Trim the TransBoth film so that its size would be same as the original.

Place original with TransBoth between Board and Film.

Start operation when 'READY' lamp starts to blink.

After operation, peel off protection carrier film. LAMIBOARD is now completed.
