

## OFFICE PRODUCTS RANGE PB3000 & P2000

### WIRE-O® BINDING MACHINES

The PB3000 is a modern, electric punch with an integral manual Wire-O® closer designed for high productivity in either the office or reprographics centre.

Operated by a simple foot pedal, it provides effortless punching of up to 20 sheets of 80gsm paper and can handle sheet sizes of up to 330mm (13").

The PB3000 is supplied with a 3:1" round hole punching tool with retractable pins as standard for Wire-O® binding of books up to 13mm thickness.

A wide range of easily interchangeable punching tools are available for Wire-O®, plastic comb and other binding systems and all feature staggered pins for clean, long life punching.

The P2000 electric punch has the power and flexibility of the PB3000 but without the integral wire closer. Designed to be used with other Wire-O® closers or other binding systems the user may select from our range of tools as listed overleaf.

## SAFETY FEATURES

For both the PB3000 and the P2000 the single phase motor is protected by its own thermal overload switch, fuse and current-sensing automatic cut-out.

The motor is also enclosed, protected and fan ventilated to produce 1/2 HP and a starting torque of 160% of full load.

## PUNCHING TOOL OPTIONS

James Burn International also offers a wide range of tool options for the PB3000 and P2000 to suit most punching applications. See the table below for details.

## VOLTAGE GUIDELINES

European voltage: 220/240V 50Hz (3.9 amps at 1350rpm).

USA voltage: 110/120V 60Hz (4.5 amps at 1660rpm).

Further information and prices are available on request.

PB38/R		Punching tool: 3:1" pitch, 38 round retractable pins
PB36/TC		Punching tool: 3:1" pitch for calendars, 36 round retractable pins with central thumbcut
PB26/R		Punching tool: 2:1" pitch, 26 round non-retractable pins
PB38/S		Punching tool: 3:1" pitch, 38 square retractable pins
PB36/TC		Punching tool: 3:1" pitch for calendars, 36 square retractable pins with central thumbcut
PB26/S		Punching tool: 2:1" pitch, 26 square non-retractable pins
